RESPONSIVE Web Design

1. https://web.mit.edu/
2. Young adults- students

3. Describe the similarities and differences between the three screenshots.

   Same font/ picture logo and colors- different layout the bigger the display, the more horizontal the layout

4. Describe two ways in which the display has been modified for smartphones.

   Menu tab in the top corner for more accessibility- way more vertically displayed.

5. Does the website meet the needs of its target audience in all three display modes? Why or why not? Justify your answer.

   Yes it does because there is no need to try and maneuver around by necessarily clicking right or left, it is all scroller friendly.
